Dear Frieda,

These are the 2010 Annual Operating Instructions for the Big Sage C & H Allotment. These Instructions are implementation of your Term Grazing Permit, 00111, as indicated in Part 2 General Terms and Conditions, 8(a-j) and Part 3 Special Terms and Conditions.

Part 2, (a) your permitted number and planned schedule of pasture use on the Big Sage Allotment is as follows:

	Pasture Name	Number	Class	Date of Use
Season Long Grazing Area:	Antelope Res./Jacks Butte Tank/ Jack's Butte	216	c/c	5/15-8/30
		100	c/c	8/31-9/30

Part 2, 8 (c) Based on range readiness, your on-date may be adjusted up to two weeks earlier or later, depending on soil and forage conditions and approval by a Forest Officer. Livestock may also be counted before going on the Forest. If this is needed, a Forest Service representative will contact you to arrange a date, time and location for counting.

Part 2, 8 (c) "The permittee will remove livestock from Forest Service-administered lands before the expiration of the designated grazing season." Dates may be adjusted only with prior approval of the Forest Officer. Actual off dates will be based on management and/or utilization criteria shown below.

Part 3 - Monitor actual conditions closely, and notify the Forest Service promptly if it appears that livestock will need to be moved sooner or later than the dates estimated above. Cattle will be moved home when utilization criteria have been reached.

Utilization criteria:

Range Condition Utilization Riparian/ Upland/Browse	Livestock Allowable Use Levels (%, inches)	Allowable use standards may be adjusted if monitoring shows a downward trend in vegetation or watershed conditions according to the adaptive management procedure in the FLRMP 4-138.
Herbaceous Satisfactory Condition	Moderate (41-60%)	
Herbaceous Unsatisfactory Condition	Light (21-40%)	
Upland Browse	Slight (20%)	
Stream bank Alteration	20%	
Aspen/Riparian Woody	Slight (20%)	
Stubble Height	3-5"	

Specific riparian areas of concern are: Essex Springs, Essex Reservoir, Salisbury Gulch and Jacks Butte Tank.

DEAR FISHER RANCH,

In order to help you with your 2012 electric budget, we have listed your total kilowatt usage and the average cost for 2011.

The irrigation energy rate for 2012 will be \$.0485 per kwh. This is an increase of approximately 8%.

If you need help determining your cost or if you desire an irrigation system pump test, please call or come by the office.

Sincerely,
Surprise Valley Electrification Corp.
